Elixir

Elixir is a dynamic, functional language designed for building scalable and maintainable applications. Elixir leverages the Erlang VM, known for running low-latency, distributed and fault-tolerant systems, while also being successfully used in web development, embedded software, data ingestion, and multimedia processing domains.

The Elixir programming language

elixir 1. a tincture composed of a sweetened solution of alcohol to which has been added a small amount of the drug to be administered. 2. a panacea, cure-all, or universal remedy.

Elixir - definition of elixir by The Free Dictionary

elixir The growth of scientific knowledge raises new visions of a modern elixir of life, and the culture of science may give them misplaced concreteness. From the Cambridge English Corpus Should we encourage unproven therapies as elixirs of hope?

ELIXIR | meaning in the Cambridge English Dictionary

An elixir is a hydro-alcoholic solution of at least one active ingredient. The alcohol is mainly used to: Solubilize the active ingredient(s) and some excipients; Retard the crystallization of sugar; Preserve the finished product; Provide a sharpness to the taste; Aid in masking the unpleasant taste of the active ingredient(s) Enhance the flavor. The lowest alcoholic quantity that will ...

Elixir is a functional, concurrent, general-purpose programming language that runs on the BEAM virtual machine used to implement the Erlang programming language. Elixir builds on top of Erlang and shares the same abstractions for building distributed, fault-tolerant applications. Elixir also provides productive tooling and an extensible design.

Elixir (programming language) - Wikipedia

Elixir has roots in the practice of alchemy; it was used in the Middle Ages as the word for a substance believed able to alter base metals into gold. Its later use for a drug purported to prolong one's life led to its use in the names of medicines of mostly questionable effectiveness.

Elixir | Definition of Elixir by Merriam-Webster

The ELIXIR Compute Platform was established in 2015 to build and integrate cloud, compute, storage and access services for the life-science research community. Today, thousands of science laboratories across the world generate massive amounts of data that they make available to collaborators directly or place in public archives for open access.
