275 to 300 is what that engine will make with a carb and decent intake on it. The TPI that came on it was a major HP limiting factor primarily based on the lower RPM capabilities of the TPI. They're not good for much over 4,500 RPM. I'd throw it in at is with a Performer intake and a Holley 600-650 cfm.

So, for its 35th anniversary year, the Corvette was treated to a number of important engine and chassis upgrades. With Tony Rudd, Lotus's former technical director, leading a team of design engineers in an engine development program to advance the L98's overall performance, the 1988 Corvette would serve as a platform upon which his design advances could be utilized.
