The Ford 4.6L V8 engine, the first member of Ford's Modular overhead camshaft engine family in the production, was introduced in the 1991 Lincoln Town Car. It was a 4.6-liter 90-degree V-angle eight-cylinder gasoline engine with two valves per cylinder and SOHC design. Later, this engine became the base V8 in the Mustang GT. Ford also has been produced a 4-valve DOHC version well known by SVT ...

The 5.4 L Triton is a V8 engine produced by Ford Motor Company. This engine, along with the several other V8 and V10 engines, are a part of what is called the Ford Modular engine family, which is essentially all of the V8 and V10 overhead cam engines.

**Ford 5.4L Triton Engine: Specs & Performance**—HGDMAG.com

My research included all versions of the 5.4 Triton engine: the 2-valve V8 Triton, 3-valve V8 Triton, and 4-valve V8 Triton. It seems that problems with the ignition system did affect all versions at one point in time. As it turns out, the 5.4 Triton engine has a coil-on-plug (COP) design – basically, a separate coil for each cylinder – all of which are positioned on top of a spark plug ...

Introduced in 1991, Ford's modular 4.6 V8 has been a very successful engine, with millions in circulation. While it's not a powerhouse, the 4.6 offers good fuel economy and can easily run well over 200,000 miles—state police will use Crown Victorias with 4.6 engines to 130,000 miles, and then taxi services buy the Crown Vics and run them for 300,000 or even 400,000. It's an engine that can ...

The 4.6-liter, modular V8 was produced with both iron and aluminum engine blocks with iron or aluminum heads. Most 4.6Ls us a single camshaft mounted on each cylinder head, which is called a single overhead camshaft (SOHC). However, some performance versions were produced with dual overhead camshafts (DOHC). The cylinder heads can utilize two, three or four valves per cylinder.
