Automotive engine design and analyses has changed dramatically and is vastly improved since the Ford Model A engine was designed and analyzed in 1927. Have you ever wondered why even the best rebuilt or highly modified Model A engine has a useful life that is just a small fraction of the useful life of a modern engine?

Re-Engineering the Model A Engine - New engines available ...

Model A Vehicle Serial Number and Location. As shown above in the 1928 Model A Ford Instruction Book, Ford did in fact specify the engine number to be the 'serial number' of the vehicle, during the Model A (and B) era, and throughout the 1930's. The Specifications and License Data page above in the Instruction Book is quite clear and specific about this.

This 1929 Ford Model A Hides Rally Car Mods and a 9,000 ...

The Ford Model T used a 177 cu in inline 4-cylinder engine. It was primarily a gasoline engine. It produced 20 hp for a top speed of 45 mph. It was built in-unit with the Model T's novel transmission, sharing the same lubricating oil. The T engine was known for its simplicity, reliability, and economy. The engine remained in production for many years, and millions of units were produced. The engine design's lifespan exceeded that of the Model T vehicle itself, with industrial, marine, and milita
