Present day cellular networks are a mixture of the technologies like GSM, EGPRS and WCDMA. They even contain features of the technologies that will lead us to the fourth generation A highly practical guide rooted in theory to include the necessary background for taking the reader through the planning, implementation and management stages for each type of cellular network.

The ASSET Suite is a comprehensive planning portfolio designed to deliver cost-effective high performance networks for 2G/3G/4G and now 5G. The products within the ASSET Suite cover radio, backhaul and capacity planning across a wide range of technologies, along with dedicated functionality for indoor coverage, Wi-Fi and small cells.
