For the operation of the in-service fleet, Airbus offers a variety of planning services to enhance material availability for maintenance events. Airbus ensures that, for both scheduled and unscheduled maintenance, customers can get all the material they need without jeopardising the planned aircraft ground-time.

CFM56-5B ENGINE Powering the Airbus A320 family. The CFM56-5B is the engine of choice for the A320 family, having been selected to power nearly 60 percent of the aircraft ordered. Today, it is the only engine that can power every model of the A320 family with one bill of materials. The engine's broad-based market acceptance has been because of its simple, rugged architecture, which gives it ...
