In elementary algebra, the quadratic formula is a formula that provides the solution(s) to a quadratic equation. There are other ways of solving a quadratic equation instead of using the quadratic formula, such as factoring (direct factoring, grouping, AC method), completing the square, graphing and others.

In Algebra 1, students solves linear and quadratic equations, and learned how the two processes are based on the same logical principles. In this unit, we extend these processes to solve a greater variety of equations, like rational and radical equations. We learn that we may sometimes get extraneous solutions. We also solve systems that include quadratic equations, and learn how we can use ...
