Algebra Polynomials Check My Answer

Algebra Polynomials Check My Answer
You check your answers in algebra on two levels: first, you see if the answer actually makes sense, and then you plug your answer back into the problem to see if it works. Check to see whether the answer makes sense. This first level of checking your answer weeds out the solutions that are

answer if it ... - algebra.com

$3xyz + 3xy2z ? 0.1xz ? 200y + 0.5. 512v5$
 $+ 99w5. 5.$ (Yes, "5" is a polynomial, one
term is allowed, and it can be just a
constant!) These are not polynomials.
 $3xy-2$ is not, because the exponent is "-2"
(exponents can only be 0,1,2,...) $2/(x+2)$
is not, because dividing by a variable is
not allowed. $1/x$ is not either.

Algebra Polynomials Check My Answer

The calculator will perform the long division of polynomials, with steps shown. Show Instructions. In general, you can skip the multiplication sign, so [Math Processing Error] $5x$ is equivalent to [Math Processing Error] $5 \cdot x$. In general, you can skip parentheses, but be very careful: e^{3x} is [Math Processing Error] e^3x , and $e^{(3x)}$ is [Math Processing Error] e^3x .

check my polynomial algebra answers? | Yahoo Answers

By the assumptions, there exist

polynomials $q_1(x), q_2(x)$ such that

$$\begin{cases} p(x)=(x+3)q_1(x)+10 \\ p(x)=(x-1)q_2(x)+2 \end{cases}$$

Hence

$$p(1)=2 \text{ and } p(-3)=10.$$

Now, by the

division algorithm, there exist a

polynomials $q(x), r(x)$ such that

$$\text{\quad } p(x)=(x^2+2x-3)q(x)+r(x)$$

and $\deg r(x) < \deg(x^2+2x-3)=2$.

Yeah, even many books are offered, this book can steal the reader heart for that reason much. The content and

Algebra Polynomials Check My Answer

Find a polynomial of degree 4 with -1 as a zero of multiplicity 1; 4 as a zero of multiplicity 2; and -2 as a zero of multiplicity 1. I got $x^3+x^2-12x-8$ as the answer. Suppose that a polynomial function of degree 4 with rational coefficients has the given numbers as zeros. Find the other zeros. 1. $-2i$, $-\sqrt{5}$. I got $2i$; $\sqrt{5}$ as the answer.
