Intel CPU Roadmap - Intel, AMD, and Other CPU Rumors

AMD roadmap suggests Zen 4 CPUs will require new processor socket in 2021 A new slide has appeared online showing the end of socket compatibility for AMD 's EPYC processors coming with 2020 's ...

AMD roadmap suggests Zen 4 CPUs will require new processor ...

The AMD Ryzen 9 3950X is so great that in our review, we went as far as to call it the baddest cat in town when it comes to processors that don 't land in the HEDT (high-end desktop) category of ...

AMD Processors: the best AMD CPUs in 2020 | TechRadar

Curiously enough, AMD did not update the desktop CPU roadmap past the Zen 3 Vermeer CPUs launching this year, but there are solid chances for 5 nm desktop variants to be launched by the end of 2021.

AMD essentially confirms 5 nm Zen 4 CPUs and "advanced ...

The leaked roadmap suggests Intel will be under continued pressure from AMD for the foreseeable future, which puts customers in good shape going forward. Tags: AMD , ddr4 , (nasdaq:amd) , usb4 , zen 3

AMD Ryzen CPU And APU Roadmap Through 2022 Leaks, DDR5 And ...

**Testing by AMD performance labs on 09/15/2019, comparing the AMD Ryzen 9 3950X (AMD's fastest 16-core) to the Intel Core i9-9960X (Intel's fastest 16-core), Using the Cinebench R20 single-core benchmark score and Cinebench R20 multi-core benchmark score to measure single-core and multi-core performance for each processor.

Welcome to AMD High-Performance Processors and Graphics

The roadmap leaked by a trusted source close to GamersNexus shows how AMD may skip 2021 entirely and launch the Zen 4 desktop CPUs along with the Zen 3 APUs in 2022 with support for DDR5 RAM and...

Leaked roadmap suggests AMD Zen 4 desktop CPUs with DDR5 ...

AMD's CPU roadmap reveals Zen 3, Zen 4, and 5nm Coming soon By Rob Thubron on March 6, 2020, 5:20 55 comments. Forward-looking: After years of living in its rival 's shadow, AMD has been ...

AMD's CPU roadmap reveals Zen 3, Zen 4, and 5nm

Accelerate your datacenter with AMD Server processors which enables balanced compute performance in intensive workloads. Visit AMD.com and deploy now!

Server Processors | AMD

The CPU will be part of AMD's Star chip microarchitecture that is being used with the current Phenom lineup. AMD is also planning a new laptop platform for this chip called "Shrike," but ...
