Qualification requirements for API 653 applicants are based on the combination of education and experience related to aboveground storage tanks.

~~API 653 Aboveground Storage Tank Inspector api.org~~

API-653 covers Tank Inspection, Repair, Alteration, and Reconstruction for larger Above-ground Storage Tanks (ASTs). Two types of inspections are defined in API-653: In-service and Out-of-service. An In-service inspection covers everything on the outside of the tank. Basically everything on the outside of the tank can be reached from outside the tank. So in a traditional API-653 inspection this can be done while the tank is in-service.

Inspection of above ground or below ground storage tanks. We have numerous technicians qualified to EEMUA 159 / API 653 and have a wealth of experience gained from many sites across the UK.

## ~~Storage Tank Inspection EEMUA 159 / API 653 | Tank Inspection~~

What is an API 653 Tank Inspection? This API Standard applies to atmospheric welded or bolted above ground storage tanks that were constructed to the API 650 standard or its predecessor, API 12C. Inspections analyze the tank for whether it is fit for continued service based on criteria analyzing the safety of the structure components.
