This guide shows you how to change the units of measurement on a Hayward / Goldline Aqua Rite Salt Chlorine Generator between US Standard and Metric units. For US Standard, the units for Temperature and Salt levels are Fahrenheit and ppm respectively. For Metric, the units for Temperature and Salt levels are Celsius and g/l respectively.

How to Change the Units of Measurement on an Aqua Rite SCG ...

The AquaRite® is an automatic chlorine generation system for pool or spa sanitation. The operation requires a low concentration of salt (sodium chloride) in the pool water. These levels are low enough that it normally will not be tasted.

Electronic Chlorine Generator

How To Set Turbo Cell Type Before operation, the Aqua Rite must be configured for the chlorinator cell that will be used. "t-1 5" is the factory default. If the incorrect cell is chosen the salt level, amperage, and voltage will not be correct and the system will turn the chlorinator off Slide the Main Switch to the "Auto" position.

Aqua Rite Diagnostics Manual - AquaRite-Troubleshooting-Guide

The Hayward Aqua Rite Salt Chlorine Generator is hands-down the most popular residential salt chlorinator in the pool industry. Just like any other salt chlorine generator, the Aqua Rite may need a quick "tune up" from time to time.

Hayward Aqua Rite Troubleshooting Guide - PoolSupplyWorld Blog

If water temperature gets below 60 degrees the AquaRite is designed to stop generating chlorine since algae can't grow in those temperatures. If you see the word HOT it means the temperature sensor inside the cell has likely failed. While rare it appears to come from immersing part of the cord in acid when cleaning the cell. 3. Cell Voltage. Ideally 22-26V when the cell is in its ON cycle ...

What do numbers on T-Cell-15 digital display mean? | Aqua Rite

Access Free Aqua Rite Electronic Chlorine Generator Manual

The Aqua Rite Goldline Salt Generator is an automatic sanitation unit used in pools and spas. The unit works by converting salt into free chlorine, which helps to kill any bacteria or algae that forms in the pool or spa's water supply. Once the bacteria or algae has been eliminated, the chlorine then changes back into salt.

How to Calibrate an Aqua Rite Goldline Salt Generator | Hunker

Before the chlorine generator can be calibrated correctly, the salinity or salt level in the pool water will need to be at the correct level. For these systems, it should ideally be between 3200-3600 ppm (parts per million). This can be tested using a salt test meter or salt test strips.
