It was an Asahi Pentax Spotmatic F. A highly respectable camera, but by this time twice superseded by the KX and then the MX in the Pentax roster and not even possessing a bayonet mount. This pro was shooting with kit less sophisticated than mine. I made a mental note to myself:

~~Asahi Pentax Spotmatic F Review — A Class Act — By Bob ...~~

Like all post- 42 mm screwmount Pentax cameras, the MX accepts all K-mount lenses (with the exception of the newer FA-J and DA lenses without aperture rings). Due to its complete lack of automatic functions, but excellent array of manual controls, the MX is often selected as a camera for photography students to practice their technique.

~~Pentax MX — Wikipedia~~

The Pentax MX was released in 1976 by the Asahi Optical Co. (which changed it's name to Pentax later, at this time Pentax was only the name used in most of the cameras they produced). It was...
