Manual registration can be completed through the cloud-to-cloud technique whenever Auto-Registration fails or in place of it. The tool can be accessed during the registration process from the bottom tool bar. Manual Registration is also only available in ReCap Pro. The left pane contains your primary scan group that you are registering.

Registration can be completed through the cloud to cloud technique whenever auto registration fails or in place of it. The tool can be accessed during the registration process from the bottom tool bar. The left pane contains your primary scan group to which you are registering. You should think of it as unregistered scans moving from the right pane and into the left pane once registered correctly

Solution: You can redo manual registration when transferring to the desktop, after transfer is complete, clicking on "open project" will take you to the screen where you can choose to go into manual registration or run auto-registration. If you go into manual registration simply remove the scan from the registration group and re-register.

Manual Photogrammetry Capture Using the object scene type, the API can process up to 300 images of objects, statues, building facades and interiors. It generates high resolution, photo realistic textured mesh models which can be viewed and edited in Autodesk ReCap Photo to create various digital assets. The output data includes:

Last year at Autodesk University, Leica and Autodesk announced the BLK360. To briefly recap, the BLK360 is a slightly new take on traditional laser scanning hardware. It ' s not designed to be high-end, but at the price point it ' s being provided at it is able to offer companies access to the technology who otherwise couldn ' t afford it.
