Automatic Source Changeover with Current Limiter (ACCL) Automatic source changeover with current limiter is a high precision device which has a current limiting function. View Catalogue Send Enquiry View Price List.

Automatic Source Changeover with Current Limiter ...

Automatic change over with current limiter is accurate and microcontroller based; It is used to measure the load current- true RMS; Under-voltage and over-voltage cutoff for DG and EB; A major saving on wiring and wall space; In single Automatic Change Over with Current Limiter during the event of changeover from DG-EB, at first the neutral is isolated then the phase is isolated

Automatic Change Over with Current Limiting Circuit

The iACCL (Intelligent Automatic Changeover with Current limiter) is designed to automatically and seamlessly switch between sources of power. It is a smart programmable device that is compatible with ELMET and other energy management
