With one big bang, the universe exploded into being 13.7 billion years ago. This is the story of how everything came about, from the moment when time and space came into existence, to the formation of the first stars, galaxies, and planets, to the evolution of human beings able to contemplate our own origins and ultimate destiny—and on to the infinite future, after the Red Giant Sun consumes Earth.

Bang! : the complete history of the universe : May, Brian ...
May, a freshly minted astrophysics Ph.D., joins forces with legendary astronomer Patrick Moore and astrophysicist Chris Lintott in *Bang!* to consider the history of the universe from the Big Bang to Heat Death. Space, time, and matter were birthed 13.7 billion years ago and will continue on longer than we are able to comprehend.

Bang! : The Complete History of the Universe by Patrick ...
BANG! Space, time, matter ... the Universe was born 13.7 billion years ago. Infinitely small at first, it expanded more rapidly than anyone can contemplate. Brian May, Patrick Moore and Chris Lintott explain how all this came about, from that moment when time and space came into existence, to the formation of the first stars, galaxies and planets, and to the evolution of human beings able to contemplate our own origins and ultimate destiny.
