This new protocol provides the ability to send voice and video over an IP network, albeit in a less restrictive way. WebRTC will not and cannot outright replace VoIP. You can have VoIP without WebRTC, as we have for many years, but you cannot have WebRTC without VoIP because it is VoIP — or, rather, an evolution of VoIP that allows it to live directly and comfortably inside your web browser.

Beyond VoIP Protocols: Understanding Voice Technology and ...

Voice over Internet Protocol (VoIP) is a form of communication that allows you to make phone calls over a broadband internet connection instead of typical analog telephone lines. Basic VoIP access usually allows you to call others who are also receiving calls over the internet.

Understanding Voice over Internet Protocol (VoIP)

VoIP phones require a number of protocols to facilitate the delivery of voice communications over the internet. H.323 is the most commonly used VoIP protocol that supports audio, videos and data...
