accuracy for the CakePHP documentation. The Cookbook also makes it easy for anybody to contribute.

The Manual - 1.3 - CakePHP
CakePHP 's new Configure class can be used to store and retrieve application or runtime specific values. Be careful, this class allows you to store anything in it, then use it in any other part of your code: a sure temptation to break the MVC pattern CakePHP was designed for.

Welcome - 4.x

CakePHP is an open-source framework that helps make development and maintenance of PHP apps much easier. CakePHP allows developers to gain enhanced control over the database and SQL queries. It was developed by Michal Tatarynowicz On April 15, 2005; MVC architecture and Built-in validation are the most important features of CakePHP
