NHS Bowel Cancer Screening Programme (NHS BCSP)

Introduction: The Bowel Cancer Screening Programme in England began operating in 2006 with the aim of full roll out across England by December 2009. Subjects aged 60-69 are being invited to complete three guaiac faecal occult blood tests (6 windows) every 2 years.

Outcomes of the Bowel Cancer Screening Programme (BCSP) in ...

Randomised trials have shown that screening for bowel cancer using guaiac-based faecal occult blood tests (gFOBTs) can reduce mortality by 16% in people offered screening and 25% in those accepting it.5, 6 Economic analyses also suggest that screening will be suitably cost-effective with a cost per quality-adjusted life-year gained of < £ 3000 for gFOB screening.7 As a consequence many countries have or are introducing bowel cancer screening programmes.8, 9 In April 2006 the Department of ...

In the scope of the European Commission Initiative on Breast Cancer (ECIBC) the Monitoring and Evaluation (M&E) subgroup was tasked to identify breast cancer screening programme (BCSP) performance indicators, including their acceptable and desirable levels, which are associated with breast cancer (BC) mortality.

Monitoring and evaluation of breast cancer screening ...

Colorectal cancer is common in England and, with long-term survival relatively poor, improving outcomes is a priority. A major initiative to reduce mortality from the disease has been the introduction of the National Health Service (NHS) Bowel Cancer Screening Programme (BCSP). Combining data from the BCSP with that in the National Cancer Data Repository (NCDR) allows all tumours diagnosed in England to be categorised according to their involvement with the BCSP.

A retrospective observational study examining the ...

What is the abbreviation for Bowel Cancer Screening Programme? What does BCSP stand for? BCSP abbreviation stands for Bowel Cancer Screening Programme.

BCSP - Bowel Cancer Screening Programme

Screening can help detect bowel cancer at an early stage, when it's easier to treat. It can also be used to help check for and remove small growths in the bowel called polyps, which can turn into cancer over time. Types of screening test. There are 2 types of test used in NHS bowel cancer screening:
