CHEMCAD. CHEMCAD represents the basic application of the CHEMCAD Suite. CHEMCAD is the tool to simulate steady state processes. The flowsheet is created in the user interface of CHEMCAD, the simulation is performed and the results are represented. A library of Unit Operations, which are required to build the flowsheet are provided on a palette.

## Chemcad | Products

CC-DYNAMICS is available as a stand-alone or add-on application. When studying mass and energy balances the steady state simulation with CHEMCAD is the programme of choice.
