Computing Help Your
Business?

Cloud computing has created a shift from the use of physical hardware and locally managed software-enabled platforms to that of virtualized cloud-hosted services. Cloud assembles large networks of virtual services, including hardware (CPU, storage,

Methodology

Cloud computing is an on-demand delivery of a virtual environment that includes pool of resources, such as compute, storage, applications, database, and network, through pay-as-you-go pricing service models which enable enterprises to host their workloads.
