Color wheel definition is - a circular diagram of the spectrum used to show the relationships between the colors.

Color Wheel | Definition of Color Wheel by Merriam-Webster

A basic color wheel contains the 12 standard colors used to create color schemes. Each slice of the pie represents a family of colors that can be achieved with different saturations, hues, tints, shades, and mixes of neighboring colors. The color combinations (e.g., yellow-orange, red-orange) result from mixing equal amounts of the base hues ...

Color theory: a beginner's guide for designers | Webflow Blog

Complementary color combinations make things stand out. Complementary colors are "opposite" colors. They are opposite of each other on the color wheel, meaning the one color they lack is that one opposite of them. They are geographically and color-wise the opposite, and provide a kind of visual tension because they are so opposed to each other.

Color Psychology In Marketing: The Complete Guide [Free ...

The color wheels can only do so much, but Color Match is smart enough to take into account any corrections done upstream of the Color Wheels when calculating the match. If you run a match and it pegs any of the color wheels parameters, it means the shots are too different, and the color wheels don't have enough latitude to make the match.
