Similarly, a cubic function has the standard form  $f(x) = ax^3 + bx^2 + cx + d$  where a, b, c and d are all real numbers and a ≠ 0. You can use the basic cubic function,  $f(x) = x^3$ , as the parent function for a family of cubic functions related through transformations of the graph of  $f(x) = x^3$ . A Complete the table, graph the ordered pairs, and then draw a smooth curve through the ...
