Introduction Corrosion

Prevention And Control

Program

A Corrosion Prevention and Control Program should be established to maintain the aircraft's resistance to corrosion as a result of systematic (e.g. age-related) deterioration through chemical and/or environmental interaction. This Program applies to damage tolerant and safe-life structures. The program is expected to allow control of the corrosion on the

Corrosion Prevention &
Control (CPC) Management
eCourse. CPC planning is the
most efficient method for
effectively addressing and
reducing the impact of
corrosion at every stage of
a product or facility's
lifecycle. This eCourse
walks through the NACE
SP21412-2016/SSPC-CPC 1
standard, diving into the
key aspects of CPC planning
for products and facilities.

Sound Corrosion Prevention and Control (CPC) planning reduces life-cycle costs, improves maintainability and availability and enhances ESOH compliance. The DoD Corrosion Prevention and Control Planning Guidebook for Military Systems and Equipment (MS&E) (i.e. CPC Planning Guidebook) helps Program Managers (PMs), Systems Engineers, Product Support Managers and other program staff develop and execute a comprehensive CPC approach.
