under Home tab > select ANSYS or MSC/NASTRAN as the solver 6.Check Out to File option > OK 7.Enter name of the study directory > OK.

## Creo Simulate - PTC Learning Connector

Creo Simulation is designed uniquely for the engineer. It comes complete with structural, thermal, and vibration analysis solutions and a comprehensive set of finite elements analysis (FEA) capabilities. With Creo Simulation, you can analyze and validate the performance of your 3D virtual prototypes before you make the first part. Read the Brochure
