Introduction to Database Design and Implementation for Business. Introduction to Database Design and Implementation for Business. MET CS 469 (4 credits) Students learn the latest relational and object-relational tools and techniques for persistent data and object modeling and management. Students gain extensive hands- on experience using Oracle or Microsoft SQL Server as they learn the Structured Query Language (SQL) and design and implement databases.

Cs 469 Introduction To Database Design And Implementation

The Term Project n CS669 students must complete a significant term project which involves designing and implementing a modest but significant database system. n The default term project is to design and implement a database system for a simple DVD rental business vaguely similar to NetFlix®. n

Undergraduate students taking CS469 may complete a term project for extra credit. n You do not need to use Oracle for your projects.
