Datameer Big Data Governance
With comprehensive big data governance in place, business can responsibly head toward a data-driven future. Addressing these data governance concerns removes a serious barrier to implementing big data initiatives in the enterprise and expanding existing initiatives, even when highly sensitive data is involved.

Big Data Governance: How to Crack the Code - Datameer
Introducing Datameer Big Data Governance... and Why it Matters by Datameer on Jun 02, 2015 Recently, I wrote a post for ZDNet called " Why Hadoop is hard, and how to make it easier " in which I addressed the results of a Gartner survey of its customers on Hadoop adoption, and Gartner's analysis of those results.

Introducing Datameer Big Data Governance and Why it Matters
Data Governance is Big Data's Law and Order. Why is big data governance important? Because data isn't just "stuff" that you make visualizations from. Data is a series of point-in-time recorded facts about your business, your non-profit organization, the disease that you're researching, the medication you're testing or the vehicle that you're managing and protecting.

My Big (Fat) Data Governance Rant - Datameer
As big data transitions to the mainstream and grows in complexity, governance around it has quickly become a top concern for the enterprise. Organizations are all asking: "Can I find that needle in the haystack? Is my data auditable? Where's the data lineage?" These concerns are only enhanced by the move to self service, which puts big data into the hands of the business user.

Crack the Code on Big Data Governance - Datameer
As this datameer big data governance, it ends happening monster one of the favored books datameer big data governance collections that we have. This is why you remain in the best website to look the incredible book to have. With a collection of more than 45,000 free e-books, Project Gutenberg is a volunteer effort to create and share e-books ...

Datameer Big Data Governance - electionsdev.calmatters.org
In the world of big data and data lakes, it's a very different equation. We have the ability for end users to bring data into the lake and to leave it in a raw form. So now what we need to do with governance is to not only enforce those access controls, but also make sure that the data that's coming in meets a certain standard.

What's Needed for Data Governance Today? - Datameer
Datameer is designed to deliver the enterprise caliber features any organization comes to expect. Data Governance vs. Big Data Governance. Posted on July 7, 2016 by Timothy King in Best Practices. In this video for Big Data & Brews, Datameer 's CEO Stefan Groschup compares how traditional Data Governance is being challenged by the emergence of Big Data. As a result of increasingly expanding stores of unstructured data, Hadoop has emerged as a major player in the data market, allowing for increased functionality across the enterprise.

Data Governance vs. Big Data Governance
One of the biggest inhibitors to applying Hadoop in any production environment is the general lack of governance tools for IT organizations to use to manage access permissions for the data that resides there.. To address that issue, Datameer today announced it has embedded a raft of data governance tools inside its analytics software that runs natively on Hadoop.

Datameer Applies Data Governance to Hadoop
Big Data governance refers to the management of huge volumes of an organization's data, exploiting it in the organization's decision-making using different analytical tools. Big Data emergence provides great convenience, but it also brings challenges.
