Dichotomous Key
Definition. A
dichotomous key is
a tool created by
scientists to help
scientists and
laypeople identify
objects and
organisms.
Typically, a
dichotomous key
for identifying a
particular type of

Bookmark File PDF

object consists of a specific series of questions. When one question is answered, the key directs the user as to what question to ask next.

Dichotomous keys typically stress identifying species by their scientific name, as each individual species
