already done, remove the inlet and exhaust manifolds with reference to the relevant Part of Chapter 4. 3 Remove the camshaft, followers and shims (as applicable) as described in Part A, B or C of this Chapter.

Chapter 2 Part D: Engine removal and overhaul procedures

Remove the valve cover on the side of the engine next to the valves. Use a feeler gauge to check the gap between the valve lifter and valve stem with the valve lifter in the relaxed - lowest - position. A typical value is .010 inches. Excessive clearance will require replacement of the valve or valve lifter.
