Digital Signal Processing - Exam Solutions
Past exam papers: Digital Signal Processing Solution notes are available for many past questions. They were produced by question setters, primarily for the benefit of the examiners. These are not model answers: there may be many other good ways of answering a given exam question! The solution notes for the most recent two year's worth of examinations are held back by the department and only made available to supervisors and other teaching staff (marked with []).

ECE 413 - Digital Signal Processing Midterm Exam - Spring 2017
It is necessary to know the Digital Signal Processing Syllabus in advance and have an idea of the topics. Make sure you cover the entire Digital Signal Processing Syllabus before the final exam itself. Prepare well for the exam by using the Unitwise Digital Signal Processing Exam Syllabus listed over here.

To give the student the mathematical tools and intuition for processing digital signals in the time, frequency and z domains. Students will learn how to filter, modify, analyze, and extract information from digital signals. For more details please see the PDF version of syllabus.

ECE 429/529 Digital Signal Processing - engr.arizona.edu
This course covers topics related to the foundations of digital signal processing. After completing this course, students should understand the essential properties of discrete -time signals and systems; understand the sampling and reconstruction of signals; be able to perform transform analysis of digital signals and systems, and apply filter
