Dragonframe brings together a powerful set of stop motion tools into one production-savvy application. Animation Tool Using a live video source, Dragonframe shows the animator a preview of the frame they are preparing to shoot and the frame's relationship with previously captured frames. The animator can compare this frame

Dragonframe User Guide for Mac

The E-STOP input can provide a secondary emergency stop button. You should attach a NORMALLY CLOSED switch between E-STOP and GND. If you do not have your own e-stop switch to attach, you must use a wire to connect E-STOP and GND. If you do not, the DMC will think the e-stop is activated and will not move any motors. RLY (Relay)

Stop Motion Software for Mac, Windows and Linux - Dragonframe
Dragonframe is the industry standard stop motion animation software. Discover why it is the choice of major movie studios and independent filmmakers.

Stop Motion Software for Mac, Windows and Linux - Dragonframe

Beginning stop motion animators should work at 12 frames per second and plan to conform their final film to 24 frames per second. To do this shoot two frames per position. If you want something to hold for a "beat" that equals about 0.5 seconds. Which means you would shoot 12 frames for that position.
