Now we would like to dump eMMC partitions and read data from it. This is mainly for debugging purpose for any field returned boards. E.g. I could read one of the partition in binary file and mount it and read its data. e.g. take partition 20(which is ext4 partition), I could read it from u-boot or using Lauterbach debugger into filename say part20.bin

OPPO A1K CPH1923 EMMC DUMP File. READ ME ONCE. Before Flash of your Mobile updating, your Device makes a backup of this otherwise after Flash you can lose your data. And if you are using Flashing box then it is better to have a complete backup of its Flash file so in case if you make a flash with the wrong Flash then you at least have original ...
