Photosynthesis is a scientific word made up from Greek words.

These words mean “ putting things together using light. ”

Inside plants ’ leaves, light causes air and water to combine to make new chemicals.

These chemicals are food for the plants.

Solutions and colloids don't separate. If you shine a beam of light into a colloid, it displays the Tyndall effect, which makes the beam of light visible in the colloid because light is scattered by the particles. An example of the Tyndall effect is the visibility of light from car headlamps through
