Guidelines~~

The ideal placement of a boiler flue depends on a number of factors. According to the boiler flue regulations, regard

Online Library Flue Installation

Guidelines should be given to the following issues when determining the appropriate placement: Distance from windows and doors. A boiler flue should not be placed close to any part of your home that can open, such as windows or doors.

~~Boiler Flue~~

~~Regulations 2020: A
Simple Guide | Skills~~

In the case that your current flue doesn't meet any of these regulations, faces out onto a public path below a height of 2.1 metres for example, then you may need to install a new boiler. However, many of the regulations only apply

Online Library Flue Installation

Guidelines

to new boiler installations so it's worth checking with a qualified heating engineer.

~~Explaining Boiler Flue Regulations | Boiler Guide~~

Typical Log Burner installation inside a chimney void requires:

- Vitreous enamel flue pipe from

~~Installation Guidelines
– BFCMA (British Flue
and Chimney ...~~

When installing a new twinwall flue system, if the flue exits the roof within 600mm (horizontally) from the ridge (high point) of the roof then the flue must extend a minimum of 600mm above the ridge. If the

Online Library

Flue Installation

flue exits the roof further down then it must extend high enough to achieve 2.3m of horizontal clearance.

~~Building Regulations For Stove And Flue Installations~~

- For flue pipe maximum and equivalent lengths with the usage of

Online Library

Flue Installation

Guidelines refer to the installation instructions with the appliance. • Every additional horizontal extension 7 719 003 666 must be supported by a bracket (not supplied).

- The horizontal air/flue duct should be fitted with an upward incline of 3° (= 52 mm per meter) in the
