Cisco Firepower Management Center - Configuration Guides ...
The FMC provides the ability to export a number of system configurations (such as policies, custom tables, and report templates) to a file which can then be used to import those same configurations to another FMC running the same Firepower version. This can be a timesaving feature for administrators adding new appliances to a deployment, but it must be used with care to prevent security breaches.

A Flight Management System (FMS) is a centralized computer system used in airliners, and other high-performance aircraft, to manage many of the aircraft systems, including (but not limited to) the flight plan. Contemporary airliners rely on the FMS to automate a wide-variety of tasks, previously performed by navigators and flight engineers.

737 Fmc Guide The true FMC was introduced with the 737-300 in 1984 this kept the performance database and functions but also added a navigation database which interacts with the autopilot & flight director, autothrottle and IRSs. The integrated system is known as the Flight Management System (FMS) of which the FMC is just one component.
