Ford 351 Modified  
Engine

Sure, "351" refers to the engine size, but there were essentially three major versions of the Ford 351—the Windsor, Cleveland, and Modified\*.

\*Officially, Ford never called these engines 400/351 Modified or

Access Free

Ford 351

400M/351M. Engine

“Modified” was a slang designation originally applied by Ford enthusiasts, and the name just stuck. You’ll also hear folks define the “M” as “Michigan” after the engine’s original casting plant. The etymology doesn’t really matter, it’s just a way for ...

Later Ford destroyed the 400 to 3.5" and that gave them a third 351 cubic inch engine - what we know of as the 351M. However, the origins of the "M" are shrouded in mystery. Some say it stands for Michigan

Access Free

Ford 351

and some say Engine

Modified, and no one seems to know for sure.

351M AND 400 -

Gary's Garagemahal  
(the Bullnose bible)

The final Ford 351 ci engine is likely the most misunderstood of the bunch. It's commonly referred to as the 351 Modified,

Access Free

Ford 351

Modified Engine  
which muddies the waters a bit, but you'll soon see the term "modified" is used in a literal sense. Some claim, instead, that the M refers to the Michigan Casting Center where the blocks originated.

Ford 351

The Ford 335 Engine

family was a group of engines built by the Ford Motor Company between 1969 and 1982. The "335" designation reflected Ford management's decision to produce an engine of that size with room for expansion during its development. This engine family began

## Ford 351

### Modified Engine

The quickest way to identify a Ford 351 Windsor engine is to count the number of bolts on the valve covers. The valve covers are located on the top of the engine, one on either side of the air cleaner, and each will have six bolts. If the valve cover is removed, you will see "351"
