This review provides a detailed overview of the rapidly advancing field of biofabrication, particularly
with regards to the use of photo-cross-linking (i.e., light-based) techniques. The major emphasis of this
review is on the fundamentals of photo-cross-linking and key criteria identified for the successful design
and implementation of photo-cross-linked bioinks and bioresins in extrusion ...

This review seeks to systematically and comprehensively detail the fundamentals, analyze the existing problems, summarize the development status and applications, and look toward the future development directions of bioelectrocatalysis. First, the structure, function, and modification of bioelectrocatalysts are discussed.
