Biotechnology/ technique of gene cloning and recombinant DNA technology Recombinant DNA technology: Gene Cloning Gene Cloning And Dna Ysis  
Researchers have discovered that non-coding DNA can get in the way of the replication and repair of the genome, potentially allowing mutations to accumulate.

**Junk DNA's Potential Role in Cancer**  
Regeneron Genetics Center has demonstrated the value of large-scale genetic sequencing in identifying novel and important targets for many serious diseases.

**Rare Mutations in CIDEB Gene Protect against Liver Disease**  
University of Virginia School of Medicine researchers have created an important new resource to provide a better look at how genes in specific cells contribute to the risk of coronary artery disease, ...

**New DNA atlas provides clues for risk of heart disease**  
Researchers have identified a gene that promotes muscle strength when switched on by physical activity, unlocking the potential for the development of therapeutic treatments to mimic some of the ...

**Researchers discover gene that promotes muscle strength during exercise**  
Researchers have created two gene-edited dogs that were born from a cloning process that involved skin cells and CRISPR.

**These are two gene-edited dogs created by cloning for the first time**  
The protective caps at the ends of chromosomes naturally shorten over time. Researchers found that direct damage can prematurely trigger senescence and contribute to age-related diseases like cancer.

**Cells become zombies when the ends of their chromosomes are damaged - a tactic both helpful and harmful for health**  
UNC School of Medicine scientists are parsing the complicated genetics that put some people at higher risk of becoming addicted to alcohol, cigarettes, and likely other substances of abuse.

**Scientists reveal genetic architecture underlying alcohol, cigarette abuse**  
Author Blake Crouch joins Ira to discuss the not-so-improbable future of gene editing from his new novel, "Upgrade." ...

**Gene Editing Is Easy-And A Crime-In This New Techno Thriller Book**  
Reportlinker.com announces the release of the report "Human Recombinant DNA: Global Markets" - The report also ...

**Human Recombinant DNA: Global Markets**  
People with hemophilia B could find their bleeding risk dramatically reduced with just one injection of an experimental gene therapy, a new study ...

**Gene Therapy Makes Inroads Against a Form of Hemophilia**  
Zymo Research Corp., in collaboration with the Institute of Virology, University Medical Center Freiburg, Germany, demonstrated data showing their DNA/RNA Shield™ Inactivating Transport Medium (ITM) ...

**Zymo Research's DNA/RNA Shield™ Inactivates Monkeypox for the Collection and Transportation of Samples**  
SaliGen Therapeutics, a privately held biotechnology company developing Gene Coding™, a new category of genetic medicine, today announced the expansion of its leadership team with the addition of ...

**SaliGen Therapeutics Strengthens its Leadership Team to Advance its Gene Coding™ Platform**  
New research published in The New England Journal of Medicine reveals that people with certain genetic loss-of-function mutations have more than 50% lower risk of nonalcoholic liver disease and ...
