different subspecialties of geography.

1.2 Geography as a Science - Physical Geography and ...

Physical geography is the study of our planet and its systems (ecosystems, climate, atmosphere, hydrology). Understanding the climate and how it's changing (and the potential results of those changes) affect people now and can help plan for the future. Because the study of Earth is vast, numerous sub-branches of physical geography specialize in different areas, from the upper limits of the sky to the bottom of the ocean.
