2002 Jetta - Coolant Temp Sensor Replacement**Golf Iv Engine Coolant**

Use a garden hose and place it in the upper radiator outlet. Turn on the hose and flush the radiator until the water runs clear out the bottom. Reattach all the hoses and fill with coolant. Do not forget if you are using concentrated coolant to mix it with the appropriate amount of distilled water.

What Coolant Do I Need To Use? - MkIV (Mk4) Golf & Bora...

Golf 1.4 TSi parked on steep hill, nose downward, for a day. Next morning, turned ignition key on and there was an audible warning and temperature warning light illuminated. Moved car about 100 yards to car park and checked coolant level on expansion tank which was about half an inch below the 'Min' level mark. No evidence of leaks from hoses etc. Contacted VW garage who advised me to top up ...

Vanishing Golf TSi coolant - Ask Honest John - Honest John

Golf Mk4 Coolant Warning - Peter D It appears that the sensor (two stainless pins) actually measures the restance thus the quantity of G12 in the water. By draining the heater and adding 1 litre of G12 the problem has gone.

Golf Mk4 Coolant Warning - Technical matters - Back Room...

On the M25 the radiator owned up and dumped all the coolant so fast the engine overheated during those hot days in early August. A new radiator followed by weeks of non-stop silly sensor and engine related issues. Moral, if it's losing fluid when it's not supposed to, don't ignore it as something will happen to spoil your day and hit your wallet.

Coolant Level Keeps Dropping - VW Golf - Volkswagen Forum

Golf Iv Engine Coolant - 1x1px.me

Antifreeze is added to the water in your engine's cooling system that lowers its freezing point (and raises its boiling point too). It's why the liquid in your radiator doesn't freeze when everything else seems to be! You can choose a concentrated coolant that needs to be mixed with water or a ready-mixed one that can be used immediately.

Antifreeze - Engine Coolant - Car Coolant - Halfords UK

Adding engine coolant (also known as antifreeze) to your 2013 Volkswagen Golf is pretty easy. Engine coolant circulates through your engine to keep it cool in the summer but won't freeze in the winter. Make sure to check your engine when it is cold for an accurate reading.

VW Golf Mk4 coolant warning light - if this coolant light is illuminated in your Golf Mk4 it will either indicate one of two things. It could mean that your coolant level is too low. Check your coolant level without delay and top up if required. ... 18 - VW Golf Mk4 engine oil/pressure warning light 19 - VW Golf Mk4 door or tailgate open ...

VW Golf Mk4 Car Warning Lights - Diagnostic World

My new Golf Mk7 GTD 184 bhp TDI DSG has had some teething problems . 1. it has used over 1 litre of oil every 4000 miles (now at 8K).Also whilst checking the oil levels, the coolant overflow reservoir was below the minimum. My local Dealer ,VW Chester, states there was an airlock in the system and oil usage is normal for this engine. Just serviced at 8400 miles.
