General fruit tree planting guidelines are as follows: Plant where your fruit trees will receive at least six hours of sun a day during the growing season. Sun should not be blocked by buildings, fences or other obstacles. Plant at least three feet from sidewalks and driveways and six feet away from buildings, as roots will spread wider than ...

Popular, dwarf fruit trees to grow in pots. If you'd like to grow your own fruit at home but have limited space, try growing fruit trees in pots. Fruit trees grow well in pots as long as they are grown on a dwarf rootstock, which means they grow to about half the size of a regular fruit tree.

[11 Best Fruit Trees to Grow in Containers | Urban Garden Gal](#)

Although every type of fruit tree has its own specific care variations, the considerations needed to grow successful fruit trees are quite similar. A healthy location, generous watering and lots of sun are key. Select a warm, sunny location for the fruit tree—one that receives at least eight hours of full, direct sunlight.

Although fruit trees can be planted from seed, the resulting trees won't necessarily produce fruit that's good to eat. In order to make sure the tree you grow will produce fruit you'll want to eat, the best idea is to buy a grafted fruit tree, which is a very young tree that has been grafted onto a root stock to improve its growth.
