Handbook Of Biomimetics And Bioinspiration~~

This multi-volume handbook focuses on the application of biomimetics
and bioinspiration in medicine and engineering to produce
miniaturized multi-functional materials, devices, and systems to
perform complex tasks.

The aim of the Handbook of Biomimetics and Bioinspiration is to serve as a reference on synthesis, modification, assembly, packaging, transportation, targeting, and recognition at their destination, conservation of information and response to foreign invaders, the creation of a dynamic living system from these assemblies, and the use of the principles governing biological systems for creating novel biomimetic systems.

growing fields in science and engineering. The first term,
bioinspiration, is a million years old. Our earliest ancestors must
have looked into the sky and dreamed of flying like birds.
