Online Library Haspi Medical Biology Lab 20

Record 1. How can the fossil record provide evidence for evolutionary relationships? Station 2. Comparing the DNA Sequence of Hemoglobin 1.

Evidence for Evolution Student Answer Sheet

HASPI Medical Biology Lab 20 The classification of organisms was mainly based on anatomical similarities until the mid-1970s, when researchers began comparing DNA, amino acids, and proteins. If the structure of DNA sequences and proteins is similar between two organisms, it makes sense to infer an evolutionary relationship between those organisms.
