In Liu Cixin's short story "The Wandering Earth (opens in new tab)" (first published in Chinese magazine Science Fiction World in July 2000), Cixin portrays a scenario in which the planet's ...

Could Earth ever leave our solar system?

It almost seems like no two planets/moons formed the same way, but one really sticks out as an oddball. It's Earth. Our planet has liquid water (weird!) It has life (even weirder!) It has plate ...

Why Does the Earth Have Continents?

Earth's journey through the Milky Way might have helped create the planet's first continents. Comets may have bombarded Earth every time the early solar system traveled through our galaxy's ...

Passing through the Milky Way's arms may have helped form Earth's solid ground

We want to bridge divides to reach everyone. Already a subscriber? Log in to hide ads. A selection of the most viewed stories this week on the Monitor's website. Every Saturday Hear about special ...

Loving the Earth

"When these rocks crystallise, they trap in vestiges of their past history," says Dr Tom Gernon, Associate Professor of Earth Science at the University of Southampton and co-author of the study.

Land plants changed Earth's composition

Oil and gas are two of the most important natural resources, contributing to over half of the world's energy supply. Reserves of these resources are thus, of high economic and strategic interest ...

New study in Earth Science Frontiers cracks code for future exploration of oil and gas in the Jizhong depression

The pivotal new project, called THAI (TRAPPIST-1 Habitable Atmosphere Intercomparison) focuses on a confirmed, Earth-sized, exoplanet labeled TRAPPIST-1e. It is the fourth planet from its host ...

Techniques learned from Earth climate science aid in the search for potentially habitable exoplanets
In the fall, Earth is tilted in just the right way to ... will begin to dazzle in high-latitude skies far more often. But why? Popular Science and UCLA space science professor Robert McPherron ...

It's finally the fall equinox—and a great time to see shimmering auroras

To say that ants outnumber people on Earth would be a gross understatement ... A separate study published in April 2020 in the journal Science found that the planet has lost more than one-quarter ...

Earth's ant population of 20 quadrillion outnumbers humans by 2.5 million times, study finds
the educational arm of Israel's Weizmann Institute of Science, an asteroid that's over 140 meters wide or more impacting the Earth would be at least a thousand times stronger than the nuclear bomb ...

Three supersonic asteroids to pass by Earth Sunday - Do we have to worry?

According to the team, there are almost 20 quadrillion ants on Earth right now. That's a 20 followed by 15 zeroes, which is a number that's hard to really get your head around.

Scientists tally up the total number of ants on Earth

Researchers have worked out an estimate for the number of ants crawling around Earth — and the total is "astounding." Scientists at the University of Hong Kong say there are ...

20,000,000,000,000,000 ants are crawling around Earth, researchers find, weighing more in total than all birds and mammals combined

But still, even if one of these asteroids did hit the Earth, it wouldn't cause much damage. According to research from the Davidson Institute of Science, the educational arm of Israel's Weizmann ...

Two asteroids set to fly past the Earth on Friday - NASA

The sun, Earth and Jupiter will nearly align perfectly ... image processing by Richard Hueso and Judy Schmidt "This one image sums up the science of our Jupiter system program, which studies ...
