Growing Baby Vegetables. Baby vegetables taste best when they are grown to harvest quickly and cooked and eaten the very day they are picked. To bring baby vegetables to harvest grow them in compost rich soil and keep them evenly moist throughout their growth, never over water or let the soil go dry.

Growing Baby Vegetables—Harvest-to-Table

Cover the bed with black plastic when growing portobellos outdoors. To sterilize the soil, lay a piece of cardboard over the compost. Cover the cardboard with a single layer of black plastic sheeting, which you can find at a general store or home improvement store. Make sure it's tight inside the bed and won't get blown away by the wind.
