No matter the exact DIY generators you intend to build, these two pieces are essential: The Stator and The Rotor. The Stator is a stationary shell that houses the Rotor, which rotates inside of the Stator. The Rotor is filled with magnets, which, as they spin within the Stator generate an electric current.

Basically, electric conversion involves removing the entire internal combustion engine from a vehicle, installing an electric motor in its place, and also adding a large bank of batteries. A...

~~Converting Your Car to an Electric Vehicle~~

Individual effects pedals, or stompboxes, are the most common type of electric guitar effect. They're the masochists of the electronic world because you literally stomp on them to turn them on and off. Most stompboxes work best when you place them between the guitar and the amp in your signal chain.
