Using Your TI-84 Plus CE Part 1: Basic Math - YouTube

A logarithm can have any number as the base, but many calculators, such as the TI-84, can only operate in base 10 or base e. A logarithm of base e is also known as the natural logarithm and is written as "ln." To add and subtract logarithms of bases other than 10 and e, the change of base formula must be applied. Adding Logs of Base 10 or e

Kelsey offers a few tips and tricks to try while using your TI-84 (Silver Edition) calculator.

Quick tips to learn for using your TI-84 Plus calculator ...

Summary: Your TI-83 or TI-84 can't differentiate in symbols, but it can find the derivative at any point by using a numerical process.That can be a big help to you in checking your work, and this page shows you two ways to do it. The TI-83/84 is helpful in checking your work, but first you must always find the derivative by calculus methods. (See your calculus text.)

Derivatives on TI-83/84

The TI-83/TI-84 calculator is an essential tool for any student in a math or science course. Solving for unknown variables is a common problem that students may run across while taking these courses. This manual tells you how to utilize your calculator to solve for unknown variables.

How to Use Solver on a TI 83/TI 84: 9 Steps (with Pictures)

Programming Using the TI-84 Plus: IntroductionProgramming is a process that leads from an original formulation of a problem to an executable-computing program. Following these instructions shows you how to program using the Texas Instruments 84 Plus.These instructions are intended f[il]

Programming Using the TI-84 Plus : 8 Steps - Instructables

3. Chi-Square table p-values: use choice 8: χ^2_{cdf} (The p-values for the χ^2 -table are found in a similar manner as with the t- table. The calculator will expect χ^2_{cdf} (lowerbound, upperbound, df). a. Left-tailed test ($H_1: \mu < \text{some number}$) Let our test statistic be $\mu_2 = 9.34$ with $n = 27$ so $df = 26$. The p-value would be the area to the left of the test statistic or to the left of

Find p-values with the Ti83/Ti84

Use a large positive number like 1000 in these cases. Enter the average, 11.8, and then press the comma key. Enter the standard deviation, 1.28, and then press the end parentheses key. When you are interested in values under the standard normal curve, enter 0,1 for the average and standard deviation.
