## **Guide Metadata Manager User - Informatica**

Metadata Manager contains models that define the classes, attributes, and relationships for different types of metadata sources. Metadata Manager packages models for many application, business glossary, business intelligence, data integration, data modeling, and relational metadata sources. You can create custom models for metadata source types for which Metadata Manager does not package a model.

Metadata Manager Interface Metadata Manager Interface You can work with resources, models, and user permissions in different ways through the Metadata Manager tabs and menus.

## **Metadata Manager Interface - Informatica**

Metadata Manager uses the model for the resource type to extract metadata objects from the metadata source. Navigate the metadata catalog to select an object. You can use the List view to drill-down through individual resources, logical groups, and metadata objects.
