The Journal of Computational Science aims to be an international platform to exchange novel research results in simulation based science across all scientific disciplines. It publishes advanced innovative, interdisciplinary research where complex multi-scale, multi-domain problems in science and engineering are solved, integrating sophisticated numerical methods, computation, data, networks, and novel devices.

### Journal of Computational Science - Elsevier

IJCS is a refereed international journal providing an international forum to report, discuss and exchange experimental results, novel designs, work-in-progress, experience, case studies, and trend-setting ideas in the area of computational science and engineering. Papers should be of a quality that represents the state of the art in the field, bringing together the latest computing advances for scientific and engineering research, applications, and education, and stimulating future trends.
