Anthropologists, psychologists, and sociologists seek answers in ways that are particular to their own discipline, but what they share is an inquiry process that helps them dive deeply into explaining what makes us act and think the way that we do. Unit 1 Activities

~~Introduction to Anthropology, Psychology and Sociology ...~~

Anthropology studies man and activities in totality but psychology studies individual behavior and personality. Anthropology deals with the socio-cultural process of human beings whereas psychology with mental process. Anthropology uses participatory observation whereas practical observation is used by psychology as social tools.
