Robert Resnick promotes special relativity in his 1967 book "Introduction to Special Relativity". Starting on page 53 discussing clock synchronization, figure 2-1 illustrates simultaneous lightning strikes in two frames, one resting and the other moving. Signal motion in the rest frame is ballistic while in the moving frame it is absolute.

Introduction to Special Relativity. Robert Resnick. I used this book as an undergrad many years ago in honors first-year physics (along with Purcell's excellent E&M book from the Berkeley Physics Series), and have referred to it from time to time since. It's a clear, patient, matter-of-fact introduction to the subject which takes the time to clarify many of the obscure and seemingly contradictory aspects of special relativity.

Abstract. It is the purpose of this book to provide an introduction to the Special Theory of Relativity which is accessible to any student who has had an introduction to general physics and some slight acquaintance with the calculus. Much of the material is at a level suitable for high school students who have had advanced placement in physics and mathematics.

8.20 is an introduction to Einstein's Special Theory of Relativity. We will probably have a lecture or two to introduce his General Theory as well, but the principal focus will be on special relativity, which we will study in quite a bit of detail.
